**DETAILED ACTION**

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Allowable Subject Matter***

2. Claims 12-18 are allowed.

The following is an examiner's statement of reasons for allowance: As the claims were read and interpreted in light of the specification, the prior art of record fails to specifically disclose a liquid crystal switching or display device comprising a chiral smectic liquid crystal mixture, and in particular, where the mixture is in monostable alignment characterized in that the ratio of the angle between the rubbing direction and the smectic layer normal to the tilt angle in the liquid crystal mixture is at least 0.41. Although Mori (U.S. Patent No. 5,629,788), Taniguchi (U.S. Patent No. 4,941,736), and Fuss (U.S. Patent No. 5,547,605) discloses features similar to that of the claimed invention, neither reference discloses a monostable alignment characterized in that the ratio of the angle between the rubbing direction and the smectic layer normal to the tilt angle in the liquid crystal mixture is at least 0.41. As a result, allowance is proper.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2871

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
